

 Benhaven

# Benhaven Learning Network

*Benhaven Learning Network (BLN) is committed to providing quality behavioral, academic and social emotional consultation to school districts and their staff.*

**BLN is a consultative group of experienced Board Certified Behavior Analysts and education professionals who provide expertise to school systems, community providers and families to improve their capabilities for educating students with autism, developmental disabilities and social/emotional or behavioral challenges.**

## CONSULTATION

---

Focusing on and interpreting the function of problem behaviors, we teach safe, community-acceptable skills that serve the same function as the current behavior. Rather than focusing on changing the person, we strive to change the features of home, school and community settings and define changes in the behavior of family members, teachers and supporters.

## DISTANCE LEARNING CONSULTATION

---

Benhaven Educational Consultants can offer a wide variety of consult to Distance Learning Programming, beyond effective Applied Behavior Analytic strategies, curricular support, social-emotional training, behavior consultation to parents and Teams, and beneficial resources to support and build capacities within school districts.
